

CARE INSTRUCTIONS

FOR YOUR MELAMINE KITCHEN

For daily cleaning we recommend you use;

A damp cloth with a small amount of detergent. A streak free glass cleaner with a soft cloth may also be used.

Any liquid spillages must be wiped off immediately. Carefully wipe spillages off the inside back of doors / drawers and from joins in cabinets.

For removing stubborn stains you can clean the surface (not the pvc edges) with the following;

- Hot soapy water then wipe dry
- Handy Andy or diluted Janola (3 to 1) then wipe with a warm damp cloth
- Newsprint - Methylated spirits or mineral turpentine
- Felt pen or dry marker – methylated spirits or acetone
- Paint – acetone or Duco Lacquer thinners (from a paint shop)
- Glue (contact type) – use Ados Solvent N (from a paint shop)

When cleaning Melamine we recommend you DON'T USE ;

Jif, Vim, Ajax, Chemico, Brasso, undiluted Janola, wire wool, scourer pads or aggressive solvent cleaning agents
