

CARE INSTRUCTIONS

FOR YOUR ULTRAGLOSS OR ULTRATOUCH KITCHEN

For daily cleaning we recommend you use;

A damp cloth with warm soapy water then wipe the remaining moisture off with a dry cloth. Household cleaners like Mr Muscle can be used providing the instructions say suitable to clean Acrylic.

Any liquid spillages must be wiped off immediately. Carefully wipe spillages off the inside back of doors / drawers and from joins in cabinets.

Occasional cleaning

We recommend using Vuplex Plastic cleaner and anti-static polish to clean, protect and polish the gloss finish on the acrylic. The anti-static repels dust particles.

You can find more information, or purchase Vuplex from www.ingear.co.nz

When cleaning Ultragloss/Ultratouch we recommend you DON'T USE ;

Cleaning products with an alcohol content, (often found in glass cleaners.) Scouring and abrasive cleaning materials will damage the gloss surface eg Jif, Vim, Ajax, Chemicco, Brasso, undiluted Janola, wire wool, scourer pads or aggressive solvent cleaning agents
